

Francesco Carelli

An experience on deciding
national projects and developments

- 
- As an EURACT member international expert, invited in WHO Committee
 - Aim: support to a Ministry of Health abroad in developing the post-graduate curricula in Family Medicine and real development for Family Medicine

Reality: many months to formalise a total change

- After home work, and Skype meetings, already spent 5 days in the country meeting Health Ministry, Medical Teachers, National Medical Associations, 2 Regional Health Authorities, PHCs in different cities and contexts.
- On development a real concrete project, strengthening FM in the Country.
- EURACT Documents as key frame.
- Academic Medicine and PHC relationship
- PHC will have new Local Health Unit (FDs)

From Minister - Committee WHO – EURACT interview

- Change of culture, mind, behavior, perception of FM role (through media, information, leaflets ...)
- Orientation on FM competences (community orientation, prevention...)
- Integration Undergraduate and new ST (new Academic Training, Departments of FM)
Homogeneity with 5 years Curriculum (to be completed in content and aims) and homogeneous logbooks and selection of Trainers and places for Teaching for best Quality

Overcoming obstacles

- New body between Health and Education Ministries
- Open relationship with Regional Authorities
- (re)training of GPs in core competences , to bypass the gap and get homogeneous quality .
- To work on choosing Academic PHC and teachers
- Create LFHC in short time to give FDs real motivation and gatekeeper position
